**Essentials Veranda Indoor & Outdoor Hardware Collection** has been developed to withstand most external elements. Its fresh, relevant and inspiring design will have you wanting to use it indoors as well. This comprehensive catalogue will assist you with selection and installation. Should you require further assistance, please contact your local Sales Representative.

#### Important Facts

##### 3 Year minimum guarantee

Unlike many outdoor collections Essentials Veranda has a hard, durable powder coat base with a clear UV finish. With proper installation the hardware will give years of maintenance free enjoyment.

#### Installations

We recommend the use of a professional installer. Rods must be supported by a bracket every 4 ft - 6 ft depending on weight of treatment. A bracket must be used to support every joint. Note that deep scratches or chips during installation will affect the longevity of the hardware. If this occurs a clear lacquer coat may be used to seal. Screws are stainless steel and must be tightly secured.

#### Contract

The Essentials VERANDA drapery hardware product line is versatile and commonly used in commercial installations. Contact your Sales Representative for contract quotations.
